## Performance Commentary

Global equities declined in February after an unusually strong start to the year. Stubborn inflation figures signal further upward tension on interest rates across the globe. Meanwhile, geopolitical risks are still simmering in the background due to Russia's unprovoked and illegal invasion of Ukraine.

SKAGEN Global underperformed the benchmark in February. The fund's top absolute performer was the Danish freight-forwarder DSV that advanced despite continued pressure on freight rates as supply chains normalise. The stock looks substantially undervalued and is a top-3 position in the fund. The worst performer in absolute terms was Estee Lauder, a global leader in high-end beauty products. Elevated inventory levels and near-term choppiness in the Asian operations weighed on market sentiment, but we believe that the company will gradually recover during the year.

We will comment on portfolio trading activity, if any, at quarter end. The portfolio holdings in the fund are characterised by strong balance sheets, a clear competitive edge and prudent management teams. We see attractive upside in the fund and look forward to hearing more from our companies during the upcoming conference season. The long-term outlook remains positive.

The fund selects undervalued companies from around the world, including emerging markets, with attractive risk-reward for long-term investors. The objective is to provide the best possible risk adjusted return. The fund is suitable for those with at least a five year investment horizon. Subscriptions are made in fund units and not directly in stocks or other securities. The fund has risk profile 6. The benchmark reflects the fund's investment mandate. Since the fund is actively managed, the portfolio will deviate from the composition of the benchmark.

\* 10.00% performance fee calculated daily and charged annually if the fund's relative value development is better than the benchmark. Underperformance in a given year which is not recovered can be reset after 5 years. The performance fee may be charged even if the fund's units have depreciated in value if the value development is better than the benchmark.

## Performance last ten years

Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skill, the fund's risk profile and management fees. The return may become negative as a result of negative price developments. There is a risk associated with investing in the fund due to market movements, currency developments, interest rate levels, economic, sector and company-specific conditions.
